EDUCATION

Vellore Institute of Technology	Vellore, Tamil Nadu
B.Tech in Computer Science and Engineering, Cyber Security	*June 2024 – May 2028 (Expected)*

EXPERIENCE

Jol Energy — Remote
Software Developer Intern — *Sep 2025 – Present*

- Selected as a Software Developer Intern to work on an AI-powered interview platform.
- Internship scope includes database design (Supabase), authentication (NextAuth.js), speech-to-text integration, and AI-driven interview logic using Gemini API.
- Currently onboarding and beginning implementation of core features.

Unified Mentor Private Limited — Remote
Full Stack Web Development Intern — *Oct 2025 – Present*

- Contributing to the development of a SuperMall web application enabling rural merchants to sell products globally through a digital marketplace.
- Developing secure product management and vendor dashboard modules with product uploads, inventory tracking, and order handling.
- Building responsive and user-friendly frontend components while integrating backend APIs for seamless data flow.

TECHNICAL SKILLS

Languages: TypeScript/JavaScript, Python, Java, C++
Frontend: Next.js/React, Tailwind CSS, HTML5, CSS3
Backend: Node.js, Express.js, SQL, NoSQL, Flask
Cloud/BaaS: Supabase, Firebase, Vercel, GitHub Pages
Tools: VS Code, Xcode, IntelliJ, Git/GitHub, npm, ESLint

PROJECTS

Habit Tracker Web App | *Next.js 14, Tailwind CSS, PostgreSQL, Prisma* | ⌠ [GitHub](#) ⧉ — Sept 2025

- Built a full-stack habit tracking web app allowing users to create, edit, and delete personal habits with daily/weekly check-ins.
- Implemented secure authentication and JWT-based authorization for user accounts.
- Developed social features enabling users to follow friends, view activity feeds, and track streaks for accountability.
- Designed a responsive, modern UI using Next.js, Tailwind CSS, and shadcn/ui components.
- Integrated PostgreSQL database with Prisma ORM to manage users, habits, completions, and friendships.
- Deployed the app on Vercel with live demo and cloud-hosted database (Supabase/Railway).

SEED (Frontend Developer) | *React, Tailwind CSS, UI Design* | ⌠ [GitHub](#) ⧉ — March 2025 – Present

- Built a platform showcasing startups to investors and the public, collaborating with a small team.
- Developed responsive and accessible UI components using React and Tailwind CSS.
- Implemented core frontend features for the chatbot interface and startup listings.
- Ensured seamless user experience for posting internships and viewing startup profiles.

Amazon Clone App | *Swift, SwiftUI, Firebase, Xcode, MVVM* | ⌠ [GitHub](#) ⧉ — Feb 2025 – Mar 2025

- Developed a fully functional e-commerce iOS app with product browsing, cart management, checkout, and order tracking.
- Implemented user authentication using Firebase Authentication and real-time database support.
- Built a persistent shopping cart with add/remove items and currency toggling (INR/USD).
- Applied MVVM architecture for clean separation of UI and logic, organizing features into modular Swift files.
